Coltrane Lounge

4/9/76

Dennis O'Brien
Dean of the Faculty

Jim, I am acting for reasons which are slightly mysterious to me as a recorder and intermediary of some recent conversations regarding the Coltrane Lounge. These conversations were held between the President and members of the BSU. It was felt that the time had come to do something with the floor of the Lounge. This is not motivated simply by aesthetics as far as BSU is concerned but because in the light of our probable need for extra classroom space next year, Coltrane Lounge would appear to be a place where we could easily move in and where BSU would be very happy to allow us to move in. My hope would be that we could work out an arrangement where part of the lounge would be carpeted and the other part might have a parquet floor (for dances, etc.). A possible suggestion would be that the dividing line be where the current room divider is located. What is necessary to get this project underway so that we can be in good shape to use this facility next year as a classroom?

At the same meeting with the President, so I am told, an agreement was made to fix up the bathroom on the second floor. The exact level of bathroom fixing up I do not know, but it was agreed between the President and the BSU that something of a fairly permanent nature should be done in that area. Again, can we get this into our schedule?
